**DECLARATION OF CHRISTOPHER D. OLSZYK, JR.**

I, Christopher D. Olszyk, Jr., being duly sworn according to law, hereby declare and state as follows:

1. I am an attorney licensed to practice in the Commonwealth of Pennsylvania and State of New Jersey.

2. I am an associate with the Law Firm of Pepper Hamilton, LLP of Philadelphia, Pennsylvania and represent Bodybuilding.com, LLC.

3. The document attached hereto as Bodybuilding.com Ex. "B-1" is a true and accurate copy of a notice titled "Letter to Health Care Professionals on Hazardous Dietary Supplement LipoKinetix" dated November 19, 2001, posted on the U.S. Food and Drug Administration website and referencing LipoKinetix distributor Syntrax Innovations, Inc.

4. The documents attached hereto as Bodybuilding.com Ex. "B-2" are true and accurate printouts of the homepage for SI03, Inc. competitors: (1) Molecular Nutrition, LLC; (2) Serious Nutrition Solutions, LLC; (3) Metabolic Augmenting Nutrition (M.A.N.) Products; (4) Designer Supplements; and (5) Gaspari Nutrition USA.

5. The document attached hereto as Bodybuilding Ex. "B-3" is a true and accurate printout of an advertisement on website [www.supplements101.com](http://www.supplements101.com) for "Adipokinetix by Forge Nutrition."

6. The document attached hereto as Bodybuilding Ex. "B-4" is a true and accurate copy of an article appearing June 17, 2004 on website [www.seMissourian.com](http://www.seMissourian.com) titled, "Bad eggs in Chaffee run afoul of laws, feds say" and discusses the importation of powdered egg by Creative Compounds in violation of the federal Egg Products Inspection Act.

7. The document attached hereto as Bodybuilding Ex "B-5" is a true and accurate printout from [www.si03.com](http://www.si03.com) for the product "Matrix 5.0" with a listing of ingredients for Matrix 5.0., including "undenatured egg albumin."

8. The document attached hereto as Bodybuilding Ex "B-6" is a true and accurate printout of an advertisement on website [www.vitaminshoppee.com](http://www.vitaminshoppee.com) for the "Syntrax Innovations Nectar Fuzzy Navel."

9. The document attached hereto as Bodybuilding Ex "B-7" is a true and accurate printout of an advertisement on website [www.nextag.com](http://www.nextag.com) for the "Syntrax Innovations Matrix 5.0."

10. The documents attached hereto as Bodybuilding Ex "B-8" are true and accurate printouts of Corporation Records from the State of Missouri for SI03, Inc. and Syntrax Innovations, Inc.

I declare that all facts and allegations contained in this Declaration are true to the best of my own knowledge; that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are

punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of this Declaration.

Dated: November 16, 2007

## **Letter to Health Care Professionals on Hazardous Dietary Supplement LipoKinetix**

Dear Health Care Professional Colleague:

We are alerting you about a dietary supplement product that we believe presents a serious public health risk. LipoKinetix, distributed by Syntrax Innovations, Inc., has been implicated in several cases of serious liver injury. The Food and Drug Administration (FDA) has received reports of at least six persons who developed acute hepatitis and/or liver failure while using LipoKinetix. The injuries reported to FDA occurred in persons between 20 and 32 years of age. No other cause for liver disease was identified. In all cases, no preexisting medical condition that would predispose the consumer to liver injury was identified. Onset of liver injury was observed between 2 weeks and 3 months of starting LipoKinetix.

LipoKinetix has been promoted for weight loss by 'mimicking exercise' and supporting 'an increased metabolic rate'. The product contains norephedrine (also known as phenylpropanolamine or PPA), caffeine, yohimbine, diiodothyronine, and sodium usniate.

FDA has issued a consumer warning advising consumers to stop using this product and to consult their physician if they are experiencing symptoms possibly associated with this product, particularly nausea, weakness or fatigue, fever, abdominal pain, or any change in skin color.

We urge you to review your cases of hepatitis in order to determine if any may be related to the use of dietary supplements in these patients. Adverse events associated with the use of dietary supplements should be reported as soon as possible to FDA's MedWatch program by telephone (1-800-332-1088) or internet (<http://www.fda.gov/medwatch>).

Thank you for your efforts and cooperation in addressing this potentially serious public health issue. For additional information, see <http://www.cfsan.fda.gov>.

Sincerely yours,

Christine Lewis Taylor, Ph.D.  
Director  
Office of Nutritional Products, Labeling and  
Dietary Supplements  
Center for Food Safety and Applied Nutrition

This document was issued on November 19, 2001.

**THE X FACTOR**

Clinically tested at Baylor University for safety and effectiveness, Anabolic X-Factor™ is the world's first patented hypertrophic catalyst. X-Factor drastically amplifies the body's sensitivity and responsiveness to resistance training, resulting in faster and more profound increases in muscle size, strength, even the rate of lipolysis (fat loss). University trials confirm remarkable increases in muscle strength, power, and endurance, adding X-Factor to the elite ranks of select few clinically proven ergogenic agents.

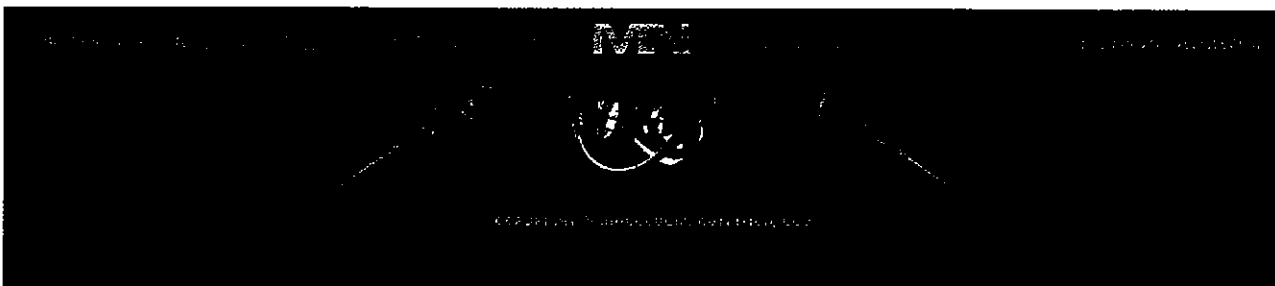

**BUY NOW  
BEAT YOUR  
OLD RECORD**

**Gaspari and Molecular Sign Patent Licensing Agreement**  
Gaspari Nutrition has signed a licensing agreement that will allow them to add the key anabolic ingredient in Molecular Nutrition's X-Factor to an upcoming product.

**X-Factor— Clinically Proven Safe and Effective.**  
Study at Baylor University demonstrates performance-enhancing benefits with X-Factor supplementation.

**X-Factor Reduces Inflammatory marker.**  
Baylor University Study data shows a lowering of Interleukin-6, the body's primary inflammatory cytokine, suggesting that arachidonic acid may offer health-protecting benefit to resistance-training individuals.

**X-Factor Induces Hypertrophy in-vitro.**  
Study at Benedictine University suggests the active ingredient in X-factor™ to be a primary hypertrophic trigger in accruing lean muscle mass.

Welcome to **Serious Nutrition Solutions**

**Serious Nutrition Solutions** is lead by a team of individuals with over 20 years of experience in the nutrition industry. We know the challenges that lay ahead of our customers on the road to achieving their goals, because we've been there to. Now, it's our time to provide the world with the types of products that we wish we'd have had ourselves.

We have independent labs do **HPLC** or appropriate testing for our products. In some cases, these tests are done on the raw materials to ensure quality before the product is even manufactured, then again on finished goods to ensure proper dosages. In other cases with multi ingredient formulas, we do raw materials testing to ensure quality of any ingredients that may be subject to quality issues. Please feel free to check all of our lab testing results using the link over in the left hand menu.

## TESTIMONIAL

## Testimonial of The Month

How would you like to see the results of your hard work displayed right here on our website?

Each month Gaspari Nutrition will choose a winner that best represents the brand. The winner will have his or her photo(s) displayed right here in this section for thousands of visitors to see and will receive a free month's supply of Gaspari Nutrition products along with a free t-shirt and shaker. To enter, email your testimonial with photo(s) to [testimonials@gasparinutrition.com](mailto:testimonials@gasparinutrition.com) be sure to include your full name, age and mailing address.

### THIS MONTH'S TESTIMONIAL

Tisha Rodrigues, 30  
Massachusetts

Click on thumbnail images to see larger versions

My name is Tisha Rodrigues. Fitness and Figure competitor, Fighter, Personal Trainer and SUPERMOM of three. I have always been a non believer when it comes to "fat burners " In fact, as a fitness columnist and trainer I always advised against them, when people ask me what to use or what works best. I have tried so many in the past to help rid me of the off season fluff...lol and none have worked. Until I tried something NEW\* I actually decided to combine two products by Gaspari Nutrition together, I thought hek they sent them to me free (as a result of winning a contest they ran on Myspace) - why not give it a shot. So, I started taking Cytolean and Thermogenic Thyrotabs together before my weight training in the morning and my fight training at night and HELLO .What a change! Seriously, I wasn't dieting or doing anything different, but trying these two new products and they honestly worked, and within about a two week period, I tend to carry my weight in the midsection and the combo of the Cytolean and Thermogenic Thyrotabs melted the fat away to my previous contest shape abs. It was the weirdest thing, but it made me a believer again. I even convinced my husband to give them a try to help him lose the extra weight he needs before his upcoming fight this month.

I absolutely swear by the two now and will continue to use them for my upcoming competitions and encourage my clients to try them out as well. In addition to the fat burners, I also began SizeOn and SuperPump250 to help me get through the grueling fight training and conditioning as well as my cardio and weight sessions in the gym. SuperPump250 is amazing! I have used it in the past and ya know if it isn't broke, dont fix it! It gives you more than an extra OOMPH, it gives you a super pump while your working out and enough energy to take you through the toughest training. You can absolutely see a noticeable difference when you train on it and off it. As for the SizeOn, it has helped increase my endurance during the fight conditioning and definitely helped me go an extra round in the sparring sessions as well. What can I say, but I'm hooked on GASPARI Thank you.

## WAVE OF BLUE

### Retailer of the month

Gaspari Nutrition will choose one winner each month for their Wave of Blue™ display. To help

promote the brand, these fine retailers have gone above and beyond to help push the line by creating an award winning display.

If your location is chosen as the retailer of the month, we will send a nice thank you package to your store that includes... free samples of a) SuperPump250, b) SizeOn, c) Cytolean, free case of shakers. Gaspari Nutrition logo t-shirts and a special Wave of Blue™ Retailer of The Month banner. You will also qualify to have Rich Gaspari, President/CEO or a Team Gaspari athlete make a promo appearance at your store. There is no better way to promote the line! So send in photos of your Wave of Blue™ product display to [waveofblue@gasparinutrition.com](mailto:waveofblue@gasparinutrition.com)

## Adipokinetix by Forge Nutrition 180 Capsules

### The Smoothest, Safest, And Most Potent Way To Lose Bodyfat!

In the not-too-distant past, the name "Adipokinetix" signified the smoothest, safest, and most potent way to lose unwanted bodyfat. Unlike the harsh stimulating action of ephedra-based formulas, Adipokinetix was based upon the superior and pleasantly stimulating 1R,2S norephedrine. Producing an almost cult following, Adipokinetix was unmatched in its efficacy until it was forced off the market along with all ephedrine-like dietary supplements. Unwilling to attach the name "Adipokinetix" to just any ole fat burning formula, we have spent an inordinate amount of time and resources to find a formula equal to the original Adipokinetix in terms of feeling and effect. Finally, after much time and research on this project, we found a formula that is every bit as good (if not better) than the original Adipokinetix formula. It is so good that we are basing the entire success of Forge off of this one product.

**Although the feeling and effect of Forge's Adipokinetix** is at least as good as the original, the formula has changed in significant ways. The old Adipokinetix was formulated around 1R,2S norephedrine while the new Adipokinetix is formulated around norphenefrine. Norphenefrine is an adrenaline-like amine that naturally occurs in the human body. We consider this ingredient the par excellence of fat burning ingredients and is unmatched in its effect and potency. Like 1R,2S norephedrine, it has been shown in studies to activate specific adrenergic receptors which powerfully mobilize and burn fat.

**We have also added caffeine but not the cheap,** typical, run-of-the-mill caffeine that is so commonly used. We developed an entirely new caffeine molecule called dicaffeine malate. This buffered caffeine salt is not only more gentle on the stomach but is also more effective due to the shuttling effect of the malate ion as well as its positive effects on energy replenishment. Like the original Adipokinetix formula, we decided to continue to use Yohimbine HCl. A tried and tested dietary supplement, Yohimbine HCl assists in the mobilization of fatty acids and works specifically with norphenefrine to target those hard-to-lose fatty areas like the midsection, hips, and thighs. Finally, we added modest amounts of phenethylamine, green tea extract, bergenin, velvet bean extract and synephrine to round out the formula and provide the energy and fat burning capability of a world class fat burner.

## Bad eggs in Chaffee run afoul of laws, feds say

Thursday, June 17, 2004

By Callie Clark, Southeast Missourian

Peruvian chickens can't be trusted.

It's a hard-boiled lesson for a Scott City business owner fighting with the U.S. government over 8,800 pounds of condemned powdered egg white product.

The controversy between Gary L. Haynes, chief executive officer of Creative Compounds, and the U.S. government dates back to August 2003, when the Scott City raw material supplier purchased the egg product from a manufacturer in Peru intending to use it in a line of sports nutrition products.

But then came a snag: According to the U.S. Attorney's office, the imported powdered eggs are in violation of the federal Egg Products Inspection Act. The country of Peru has no continuous inspection system, which means the eggs are prohibited for human consumption in the United States.

Haynes tells a different story, claiming he was given a permit to legally import the product from Peru by the U.S. Department of Agriculture, but that agency later discovered such a permit should not have been issued after the shipment had already reached his warehouse in Chaffee, Mo.

"We asked numerous times if there were any other requirements, and we were told numerous times that we just needed this permit," Haynes said. "They allowed the material into the country, and three months later the USDA caught on to the fact that they'd messed up in giving me the permit."

A declaration of support for seizure and condemnation from the USDA holds that Haynes did apply for and receive a special permit in October 2003 to import the product. However, the declaration alleges that he failed to follow the necessary requirements to validate the permit.

The egg whites are currently stored in Haynes' warehouse in Chaffee. Michael Price, assistant U.S. Attorney for the federal court's eastern district of Missouri, said the eggs will eventually be seized by the U.S. Marshals Service in cooperation with the USDA.

"We have to seize it for now so we can make sure it won't go to consumers," Price said.

Price said the uninspected egg whites pose a risk of salmonella poisoning.

USDA spokesman Matt Baun said salmonella is found in eggs and is one of the leading causes of food-borne illnesses.

"The regulations in the U.S. are to safeguard our food supply from that through a thorough inspection process," Baun said.

Ordinarily, if a food product is not from a country with an approved inspections system, such as Peru, that product is detained at the U.S. border, Baun said. In Haynes' case, the egg whites arrived in New York in September 2003 and were transported to Chicago, where they were held until Creative Compounds received the special permit.

Haynes says a USDA investigator arrived at his warehouse last December and began asking questions about the powdered eggs. Haynes was asked to voluntarily destroy the eggs at his own cost, but refused to do so.

"They wouldn't let us export it or sell it," Haynes said. "They're calling it a significant health risk. We asked if it could be tested to see if anything was wrong with it. They refused. All they wanted was to get rid of it."

Earlier this month, Haynes filed a lawsuit against the USDA under the Federal Claims Tort Act, seeking compensation for the egg product.

"We don't have anything to hide. We're a small company trying to make it in Southeast Missouri and here you have the government trying to blame the little guy," Haynes said. "They let that material come through, and they weren't supposed to, regardless of any requirements that were added to the permit."

# MATRIX 5.0™

## Sustained Release Protein Blend

- || MIXES INSTANTLY AND COMPLETELY WITH A SPOON
- || ANABOLIC & ANTICATABOLIC PROTEINS
- || COMPLETE BLEND OF WHEY PROTEIN , MICELLAR CASEIN AND EGG ALBUMIN
- || INCREDIBLE TASTE EVEN IN WATER
- || IDEAL FOR BARIATRIC PATIENTS

### THE HYPE

**THE PROBLEM:** Five pound containers of protein that are low in quality, contain fat-inducing maltodextrin, taste horrible, require a blender to mix properly, and contain only one very fast-acting protein. No doubt that most of these "five pounders" are cheap but who wants to gag something down day after day that's neither convenient nor beneficial?

**THE SOLUTION:** Matrix 5.0™. Taking years to properly formulate, Matrix 5.0™ solves all of the problems currently afflicting those other "five pounders". Most importantly, we completely stayed away from cheap, inferior protein sources such as denatured sodium and calcium caseinate. We knew that to be the best, we had to use only the highest quality undenatured protein sources such as ultrafiltered whey protein, ultrafiltered milk protein, undenatured egg albumin, and glutamine peptides. The costs are much higher, but the rewards are significant. These proteins not only taste great but they are unmatched in their ability to improve overall health as well as build critical bodily tissues and processes. To make the absolute best "five pounder" in the industry, we knew we had to do even more. We decided that we would not settle for anything but the absolute best tasting protein powder on the market. After countless trials, we arrived at several flavors that are pure ecstasy to consume...Simply Vanilla, Perfect Chocolate and Orange Cream. Completing our solution to the problem, Matrix 5.0™ is thoroughly instantized so that every scoop dissolves perfectly in your favorite beverage. No more disgusting clumps or blenders that dirty your kitchen...with Matrix 5.0™, you only need a spoon!

### SUGGESTED USE

Mix one scoop of Matrix 5.0™ per 8 ounces of water or milk. For those with lower protein needs, one half scoop may be consumed with 4 ounces of water or milk. Note the extra calories when combined with milk. Consume Matrix 5.0™ two to three times per day to satisfy your protein requirements. Remember, the best times for supplementing protein are immediately upon rising in the morning, after intense physical activity such as weight training and prior to sleep. Matrix 5.0™ mixes instantly with a spoon and tastes great...**GUARANTEED!**

### DARE TO COMPARE

- A) Only 5 pounder with superior blend of 3 protein sources
- B) MUCH better taste than competition
- C) More servings than competition
- D) Less sugar and fat than competition

### THE FACTS

1. What is Matrix 5.0™ ? Matrix 5.0™ is a 5 pound blend of the highest quality protein concentrates in the industry.
2. What makes Matrix 5.0™ higher quality than the competition? Every other economical five pound protein powder on the market is simply whey protein. Although more expensive, Matrix 5.0™ contains a combination of 3 different high quality proteins including whey protein, micellar casein and egg albumin (egg white protein).

**MATRIX 5.0™**

**Sustained Release  
Protein Blend**

### **THE FACTS**

3. Why a blend of different proteins instead of just one protein? Indeed, there are several, very high quality protein sources such as egg, casein, and whey; however none of them are perfect in every aspect. All of these protein sources are equal in terms of overall health and growth of lean body tissue, but each has their specific physiological strengths and weaknesses. For instance, egg protein is considered the gold standard protein source. Not only does it perfectly support lean tissue growth and maintenance, but it contains a host of growth factors and micronutrients. The downside is that it is very expensive. Whey protein isolate, on the other hand, has been shown to be the fastest metabolized protein source and to have superior immune-stimulating abilities. Casein has been shown to be the slowest metabolized protein source which makes it superior for providing muscle tissue with amino acids over an extended period of time. Thus, even though ingesting one protein source has many benefits, ultimately the best course of action is to consume several high quality protein sources in order to minimize the weaknesses and maximize the strengths of each source.

4. When is the best time to use Matrix 5.0™ ? Because it contains proteins which are metabolized both quickly and slowly, it is an ideal protein source for any time of the day. Some people will consume a fast-acting protein source like whey protein after a workout and consume a slow-acting protein source like casein before bedtime. Since Matrix 5.0™ contains slow (casein), medium (egg) and fast (whey) acting proteins, it is ideal for any situation. It has the ability to bombard lean body mass quickly with amino acids as well as provide the body with these same nutrients over an extended period of time.

5. Is Matrix 5.0™ a superior protein for medical conditions such as bariatric surgery patients? Yes! Matrix 5.0's amino acid profile is best out of any protein on the market. Furthermore, because it provides the unique benefits of three different protein isolates, it offers the best opportunity for increasing overall health and well being...from increasing lean body mass to decreasing fat stores to increasing antioxidant status to increasing the immune system to protecting the kidneys, etc, etc.

6. How can Matrix 5.0™ be so economical if it contains more expensive proteins? Notice that Matrix 5.0™ is packaged in a high quality laminated bag. There is a considerable savings in packaging with this method which consequently offsets the increased costs of the proteins. Do not worry about freshness! The laminate used for Matrix 5.0's bag is an oxygen and moisture barrier structure which works as well or better than the typical plastic jugs. Furthermore, it contains a recloseable zipper for convenience and uses less of our precious non-renewable resources.

**Directions:**

Mix one to two scoops of Nectar In 8 ounces of water per scoop. Consume Nectar two to three times per day to satisfy your protein requirements. Remember, the best times for supplementing protein are immediately upon rising in the morning, after intense physical activity such as weight training and prior to sleep. Nectar mixes instantly with a spoon and tastes great.

**Other Ingredients:**

Promina ultrafiltered and undenatured whey protein isolate (includes beta lactoglobulin, alpha lactoalbumin, glycomacropeptides, immunoglobulin, bovine serum albumin, protease peptone, lactoferrin, lacto peroxidase), citric acid, natural and artificial flavors, lecithin, gardenia extract powder, acesulfame-k, sucralose.

**Warnings:**

Use this product as a food supplement. Do not use for weight reduction.
